Key Features

Customer Database

One of the most valuable assets in any Xenia software is its Customer Database. The Customer Database Stores Name, Address, Multiple Telephone Numbers, Delivery Instructions and more. Staying in touch with existing customers is the best way to improve restaurant sales.

Improved Efficiency

Employees can enter orders quickly and get order information, cash out orders and keep your customers happy.

Touch Screen Order Entry

Xenia lets you design your menu to fit your way of working and the dishes you serve. Works with standard touch screens or a mouse and keyboard.

Order Taking

Our single screen order taking process is quick and easy. It Helps help personalize service, and reduce mistakes

Track and Secure Payments

Xenia tracks every payment for every order, letting you control and secure your cash. The software is designed to let you process credit/ cash payments through the system.

High Clarity Bill Receipts

Detailed customer receipts give your establishment a professional appearance.

Reports

Xenia maintains history on your orders, payments, Bills, customers, employees and more. Use this information in system reports to help you run a better business.

Security

In Restaurant Billing, it's important to keep tight control over cash receipts to prevent theft. Most of these systems provide audit trails so you can trace any problems with the help of Activity Monitor.

Conclusion

Xenia helps you easily train new people and improve on overall guest experience. Trained staff means result in smooth operations, so that guests visit your restaurant time and again.
